Powerful Solution for Vet

A screenshot of a software interface titled "Patient Management". It features a form with various fields for patient information. The "Patient Type" field has a dropdown menu with "Small Animal" and "Big Animal" options. The "Room No." field has a dropdown menu with "Small Animal" and "Big Animal" options. The "Gender" field has a dropdown menu with "Male" and "Female" options. The "Paced" field has a dropdown menu with "Neutered" and "Spayed" options. The "Custom Field 1" through "Custom Field 4" fields are labeled "Input". The "Discharge Patient" button is at the bottom left, and "Save" and "Cancel" buttons are at the bottom right.

New Animal Management Algorithm

It has a specially customized animal management algorithm, making a specific division of the animal's body size and gender for accurate monitoring and diagnosis.

New Cutting-edges Modules-Drip Monitoring

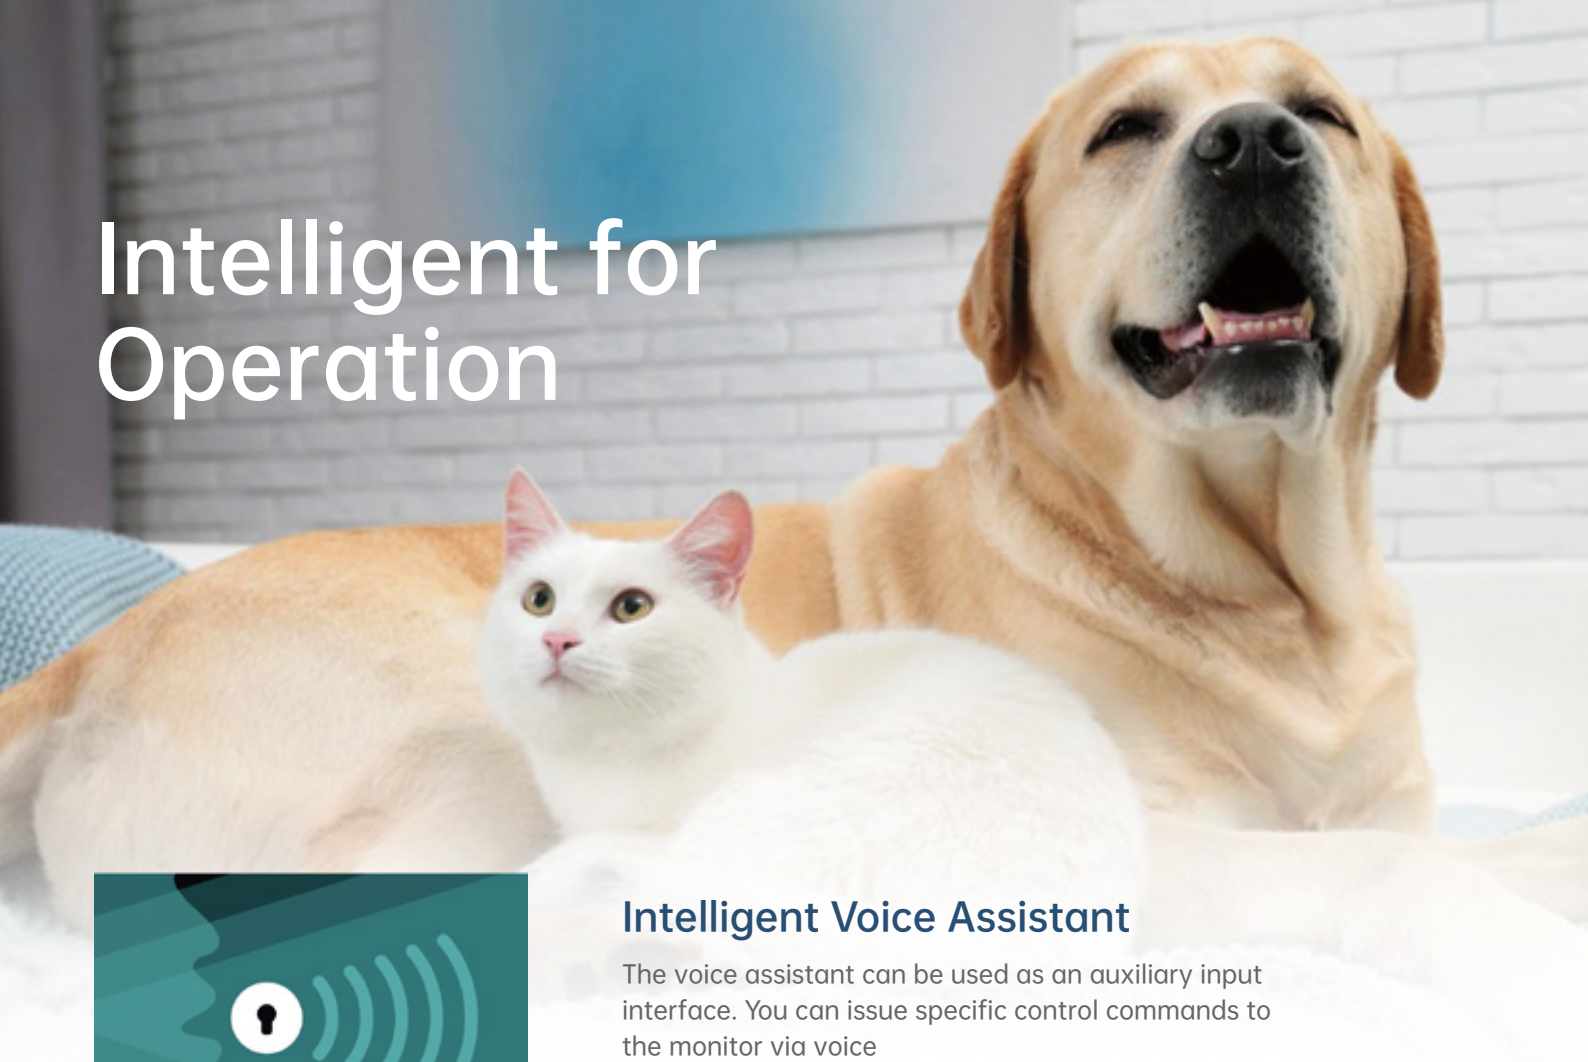

Drip monitoring function, which can monitor the drip rate and clamp the infusion tube to stop the infusion. It helps the veterinarian to set the drip rate and gives a safer infusion to the animal

Comprehensive Parameters Monitoring

Support high-end parameters :2-IBP, C.O, EtCO2 (Mainstream/Sidestream)
Customized parameter: Masimo EtCO2 (Mainstream/Sidestream), BLT Provet

Intelligent for Operation

Intelligent Voice Assistant

The voice assistant can be used as an auxiliary input interface. You can issue specific control commands to the monitor via voice

Full-touch Operation

- 12.1" TFT capacitive touchscreen
- Intuitive multi-finger gesture to adjust volume and brightness
- Gesture support to choose different layouts or menu

User-Friendly Interface Setting

- Parameter list highlights the abnormal parameter
- One touch to instantly adjust parameter's setup, alarm and check trend review
- 26 Quick keys to reach 90% of common monitor functions in 2 steps

Multiple high-end parameter options
